The term Meritage is defined  
as a blend of the best and  
absolute highest quality  
components

We don't take this lightly

The term Meritage is defined as a blend of the best and absolute highest quality components

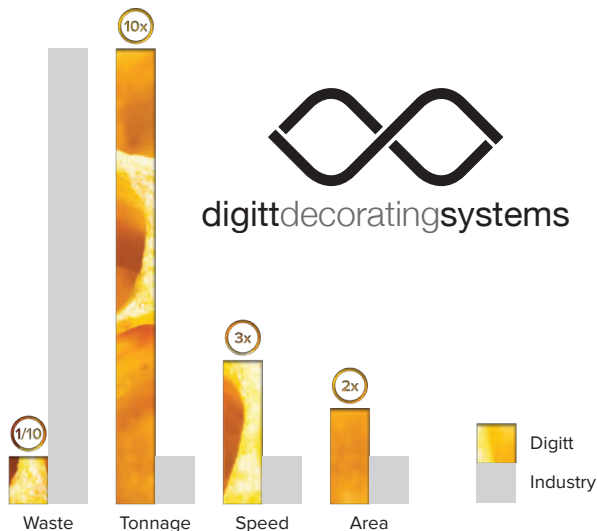

From a values perspective, the term Meritage reflects our dedication to creating a unique, client tailored blend by utilizing the most advanced manufacturing technologies available, our highly specialized team of experts, and personalized customer focused processes.

Our customers are consistently provided with the highest quality product on the market

Meritage customizes this blend of technologies, experience, and processes according to current market conditions to ensure the customer is consistently provided with the highest quality product on the market.

# MERITAGE

SPECIALTY PACKAGING LTD.

digittdecoratingsystems

## Digitt Decoratings Systems win out in nearly every measurable category

Digitt Decoratings Systems provide a customized set of extremely accurate, intense and repeatable decorating techniques, which are perfectly matched with high-end digital color graphics. Digitt has infinite combinations of converting, decorating and functional techniques, which can be added to any package at minimal cost.

Foil stamping, embossing, textures, coatings, security features, and variable imaging, along with custom complex dies and tool making, are all produced to award winning world-class standards. Up to four foils may be accomplished in a single pass along with extremely complex registered sculptured embossing, all of which are hallmarks of Digitt and Meritage's high value added packaging solutions.

Unrivaled team  
Cutting-edge technology  
Superior quality standards

By commercializing cutting edge technology and providing an unbeatable value proposition, not only do we offer our clients an exceptional opportunity for brand differentiation, we save them money too.

Taking charge takes experience. At the Meritage helm, Jay Tapp, CEO, and Dawne Tapp, President, draw from over 30 years experience in high value-added printing and packaging.

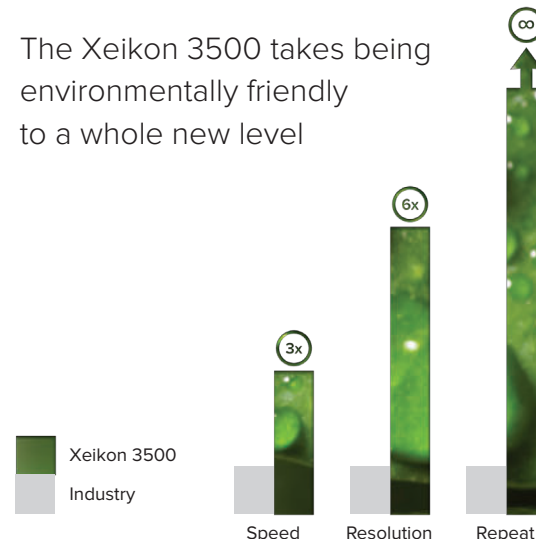

"Our goal is to always be on the absolute leading edge of visual packaging technologies. We listen to what clients tell us they want, and aim for technical innovations that will knock their socks off."

NOW THAT IS  
**EPIC!**

Product decoration technology has not been standing still. Digital printing technology, for one, is capable of meeting most, if not all of the market's requirements, while maintaining profitability. By nature, it allows unlimited variability. Not only is it uniquely suited to the production of multi-version labels, the absence of set-up costs makes it also ideal for cost-effective short to medium print runs. The Xeikon digital color workflow is both robust and stable, and neatly integrates with the most advanced color management systems. Not only that, it has many features and advantages that give you access to a whole range of new business opportunities.

The Xeikon 3500 takes being environmentally friendly to a whole new level
